

Secure Talk Platform – Overview & User Guide

1. Introduction

Secure Talk is an anonymous mental wellness platform designed to provide a safe space where individuals can share their thoughts and receive support either from the community or from professional counsellors.

The system is built with two main parts:

- **Public Website (Frontend):** Where users share and interact
 - **Admin Dashboard (Backend):** Where counsellors manage and respond to private messages
-

2. How the System Works (Simple Explanation)

A. For Users (General Public)

Users do NOT need to create accounts. The system works anonymously using a secure session.

1. Sharing a Message

- User visits the **Share Page**
- They choose:
 - **Public Post** → visible to everyone
 - **Private Message** → only visible to counsellors
- They select a category (e.g., Anxiety, Stress)
- They write their message and submit

2. What Happens Next

- A unique anonymous session ID is created automatically

- The message is securely stored
 - Depending on type:
 - **Public** → appears in the Community Feed
 - **Private** → sent directly to counsellors
-

B. Public Interaction (Community Feed)

Users can:

- View posts shared by others
- Filter by categories
- Open a post and read responses
- Send supportive replies (anonymous)

This creates a supportive peer-to-peer environment.

C. Private Support (Confidential Messaging)

When a user selects **Private**:

- The message is NOT shown publicly
- It is only visible to counsellors in the backend

User Access to Replies:

- After submitting, the user is guided to “**My Messages**”
- This page shows:
 - Their private messages
 - Replies from counsellors

No login is required — the system remembers them using their device.

3. Counsellor Workflow (Admin Dashboard)

Counsellors access the system through a secure admin panel.

Features available to counsellors:

- View all **private messages**
- Identify:
 - Messages that need replies
 - Messages already handled
- Read user messages anonymously

- Send replies directly

Important:

- Counsellors DO NOT see user identities
 - All communication remains anonymous
-

4. Navigation Guide

For Users

1. **Homepage**
 - Entry point to the platform
 2. **Share Page**
 - Write and submit messages
 3. **Community Feed**
 - View public discussions
 4. **Post Detail Page**
 - Read and respond to posts
 5. **My Messages**
 - View private conversations with counsellors
-

For Counsellors

1. **Admin Login**
 - Secure access via backend dashboard
 2. **Dashboard**
 - Overview of incoming private messages
 3. **Messages Section**
 - View and respond to users
-

5. Privacy & Safety Features

- No user accounts required
 - Anonymous session tracking
 - Private messages are NOT public
 - Messages automatically expire (e.g., after 14 days)
 - No personal identity stored
-

6. Key Benefits of the System

- Encourages open sharing without fear
 - Provides both community and professional support
 - Simple user experience (no signup required)
 - Secure backend for counsellors
 - Scalable and easy to manage
-

7. Summary (For Clients)

Secure Talk is designed to:

- Lower the barrier to seeking help
- Provide safe, anonymous communication
- Enable counsellors to respond efficiently
- Maintain strong privacy standards

The platform balances:

- **User simplicity**
- **Professional support tools**
- **Data privacy**
